Dear Principal and Deputy Principal

We are happy to inform you that our publications in 2011 will include:

- **NATIONAL TRIAL EXAMINATION PAPERS (NTEP)**

National Trial Literacy and Numeracy Papers (**Years 3 and 5**)

- **PAST ENGLISH AND MATHEMATICS ASSESSMENT PAPERS**

English and Mathematics Assessment Papers (**Years 1 to 6**)

- **K-6 MATHEMATICS PROGRAM AND POLICY**

Our **National Trial Examination Papers (NTEP)** provide an initial diagnostic assessment, while the **Yearly Assessment Papers** provide a longer term, complete solution for enhancing students' literacy and numeracy skills.

Together, the NTEP and the Assessment Papers will improve levels of competency in all areas of English and Mathematics by facilitating the early assessment of students' skills, helping teachers to identify areas of strength, or where students may need additional assistance.

### **NATIONAL TRIAL EXAMINATION PAPERS (NTEP)**

These Trial papers are excellent preparation for the National Assessments in Literacy and Numeracy (**NAPLAN**). They assess the essential skills, knowledge and understanding that Year 3 and 5 students need to learn. In addition, they enable students to show what they have learned in class and build skills in exam techniques.

Each NATIONAL TRIAL LITERACY AND NUMERACY PAPER is designed in the same format of the NAPLAN.

- **Literacy Papers** consist of three sections: Language Conventions (Grammar, Punctuation and Spelling), Reading, and Writing. This helps teachers to improve the Literacy skills of their students.
- **Numeracy Paper** provides a diagnostic approach in helping teachers to measure students' abilities to work mathematically as well as to assess their knowledge, understanding and skills.

## **PAST ASSESSMENT PAPERS (Years 1 to 6)**

### **English Assessment Papers**

This easily administered diagnostic tool is designed to assess students' skills in Language and its conventions (Grammar, Punctuation and Spelling), Reading, and Writing. Our exciting English Assessment Papers allow teachers to respond to individual needs of students as well as evaluate grade performance levels.

### **Mathematics Assessment Papers**

Specially designed papers cover all Mathematics strands including: Number, Patterns and Algebra, Data, Measurement, and Space and Geometry. Each strand is designed to measure students' abilities to work mathematically, as well as to assess their knowledge, understanding and skills.

### **Features of English and Mathematics Assessment and Examination Papers**

- **Easy to administer** – With no scheduling restrictions or examination dates.
- **Time effective**
- **Quick and easy to mark**
- **Assists with reporting**

**ALL 2011 NATIONAL TRIAL EXAMINATIONS and YEAR 1 TO YEAR 6 PAST ASSESSMENT PAPERS include fully worked solutions in mathematics and detailed sample answers with varying alternatives.**

**In addition, each Trial examination or assessment paper includes a comparative grid mapping to the NATIONAL STATEMENTS OF LEARNING and NSW syllabus outcomes.**

### **K-6 Mathematics Program and Policy**

The Policy aims to promote mathematics learning at school. It includes sections on Social Justice, Numeracy and Literacy, Information Communication Technology, Assessment and Reporting, and practices for Students with Special Needs, including Gifted and Talented.

The Program aims to provide a complete sequential teaching program from Kindergarten through to Year 6. It is based on the NSW Mathematics K-6 Syllabus and contains a specific scope and sequence of the teaching and learning units for each year, and a general framework across the Primary stages.

The spiral nature of the program together with its sequence of topics addresses the knowledge requirements of students, enhances their learning and promotes effective teaching.

Each teaching and learning unit provides teachers with suggested learning experiences that cater for diverse learner needs that include the use of Literacy, technology and working mathematically. In addition, pre-unit and post-unit assessment samples are included to assist teachers in determining student progress and achievement. The unit also provides references to the most common student textbooks. It also has references to useful websites where appropriate.

We are confident that schools will benefit from this policy and program in promoting mathematics teaching and learning.
