

YEAR 3 – PAPER 2
NUMERACY WORKED SOLUTIONS

	ANSWER	EXPLANATION	Australian Curriculum Reference A student can						
1	2	<p>Sunny </p> <p>Bonny </p> <p>From the diagram we can see that Sunny has eaten 2 more carrots than Bonny.</p>	<p>create displays of data using picture graphs and interpret them. (ACMSP050)</p>						
2	<table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th colspan="2">Game Points</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">Kevi</td> <td style="text-align: center;"> </td> </tr> <tr> <td style="text-align: center;">Jame</td> <td style="text-align: center;"> </td> </tr> </tbody> </table>	Game Points		Kevi		Jame		<p> represents 1 and represents 5. So 12 would be represented by , and 3 would be represented by . Only the fourth table shows their scores.</p>	<p>create displays of data using tables and interpret them. (ACMSP050)</p>
Game Points									
Kevi									
Jame									
3	8	<p>As shown, there are 8 circles in the picture.</p> 	<p>recognise and classify familiar two-dimensional shapes using obvious features. (ACMMG022)</p>						
4		 <p>By drawing 2 horizontal lines, it can be seen that all the flowers begin at the same level and the fourth flower is the shortest.</p>	<p>compare and order several shapes and objects based on length using appropriate uniform informal units. (ACMMG037)</p>						
5			<p>identify the relative positions of key features. (ACMMG044)</p>						

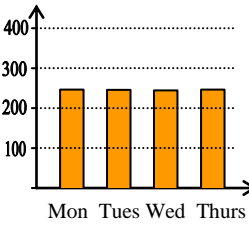

6	4	 <p>As shown, four of the solids are cylinders.</p>	<p>recognise and classify familiar three-dimensional objects using obvious features. (ACMMG022)</p>
7		 <p>As shown, the kitten moves 3 squares to the right and then one square up to get .</p>	<p>create and interpret simple grid maps to show position and pathways. (ACMMG065)</p>
8		<p>John ordered the warriors, starting from the warrior with the most number of votes to the least, as shown.</p> <p style="text-align: center;">Number of votes</p> <p style="text-align: center;">35 29 28 22</p> 	<p>order numbers to at least 1000. (ACMNA027)</p>
9	25	<p>As shown, for each jump the number pattern goes down by 10.</p> <p>So the cup is at 25.</p> 	<p>describe, continue, and create number patterns resulting from performing addition or subtraction. (ACMNA060)</p>
10	7	<p>If $18 - \square = 11$ then $\square + 11 = 18$</p> <p>So the box must represent 7.</p>	<p>explore the connection between addition and subtraction. (ACMNA029)</p>

11	a triangular prism.	<p>The top is a triangular prism.</p>  <p>The bottom is a rectangular prism.</p>	describe the features of three-dimensional objects. (ACMMG043)
12		<p>The arrows show where the faces of the solid appear when viewed from the side.</p> 	make models of three-dimensional objects and describe key features. (ACMMG063)
13	Five hundred and twenty dollars	<p>There is a 5 in the hundreds column and a 2 in the tens column.</p> <p>This means that the price of this laptop is five hundred and twenty dollars.</p>	recognise, model, represent and order numbers to at least 1000. (ACMNA027)
14	3	<p>Every two 5 cent coins make one 10 cent coin.</p> <p>So David can get three 10 cent coins for his six 5 cent coins, as shown.</p> 	count and order small collections of Australian coins according to their value. (ACMNA034)
15	27	<p>The total number of animals that Tania saw at The Magic Circus was</p> $5 + 4 + 7 + 4 + 7 = 27$	create displays of data using a table and interpret them. (ACMSP050)
16	208	$100 + 100 = 200 \text{ and } 200 + 8 = 208$	solve simple addition problems using a range of efficient mental and written strategies. (ACMNA030)

17	50	<p>The highest mark scored is 95. The lowest mark scored is 45.</p> <p>So the difference between these marks is $95 - 45 = 50$.</p>	<p>solve simple subtraction problems using a range of efficient mental and written strategies. (ACMNA030)</p>
18	$6 + 6 + 6$	<p>Only $6 + 6 + 6$ gives a total 18, which is between 16 and 19. All other options give a total higher than 19 or lower than 16, as shown.</p> <p>$7 + 7 + 7 = 21$ $5 + 5 + 5 = 15$ $4 + 4 + 4 = 12$</p>	<p>solve simple addition problems using a range of efficient mental and written strategies. (ACMNA030)</p>
19	8	<p>There are 8 pieces missing, as shown in the picture.</p> 	<p>describe and draw two-dimensional shapes. (ACMMG042)</p>
20	56	<p>Johnny took 8 cookies and the jar now contains 48 cookies. So, at the start the jar contained $48 + 8 = 56$ cookies.</p>	<p>solve simple addition and subtraction problems using a range of efficient mental and written strategies. (ACMNA030)</p>
21		 <p>As we can see, there is only one roll of Vegies, so it is impossible for Kevin to select two rolls of Vegies.</p>	<p>identify practical activities and everyday events that involve chance and describe outcomes as 'likely' or 'unlikely' and identify some events as 'certain' or 'impossible'. (ACMSP047)</p>

22		<p>The pattern shows the time on the clocks increasing by 1 hour and 30 minutes.</p>  <p>So the missing time on the clock is 8:00.</p>	<p>describe, continue, and create number patterns resulting from performing addition. (ACMNA060)</p>
23	\$40	<p>Tom has $\\$95 - \\$55 = \\$40$ left after buying the basketball.</p>	<p>solve simple subtraction problems using a range of efficient mental and written strategies. (ACMNA030)</p>
24	13	<p>Phillip is 11 years old.</p> <p>Rachel is 3 years younger, so she is $11 - 3 = 8$ years old.</p> <p>Brandon is 5 years older than Rachel, so he is $8 + 5 = 13$ years old.</p>	<p>solve simple addition and subtraction problems using a range of efficient mental and written strategies. (ACMNA030)</p>
25	Wrote his first book	<p>Each interval on the timeline represents 5 years.</p> <p>So, between 1990 and 1995 Tim wrote his first book.</p>	<p>interpret and compare <u>data</u> displays. (ACMSP070)</p>
26	11	<p>Peter has $14 + 7 = 21$ lollies in his two bags.</p> <p>James has the same number of lollies as Peter, so he has a total of 21 lollies.</p> <p>Now, as James has 10 lollies in one bag then he has $21 - 10 = 11$ lollies in his other bag.</p>	<p>solve simple addition and subtraction problems using a range of efficient mental and written strategies. (ACMNA030)</p>

27	2	<p>As we can see, when the apples are placed into groups of 4, there are 2 left over.</p> 	<p>recognise and represent division as grouping into equal sets and solve simple problems using these representations. (ACMNA032)</p>
28		<p>If the middle 2 columns are swapped, it is clear that this square is half shaded.</p> 	<p>compare and order several shapes and objects based on area using appropriate uniform informal units. (ACMMG037)</p>
29	27	<p>For every \$3, Angela can buy 9 balloons.</p> <p>As there are three lots of \$3 in \$9, then Angela can buy 3 lots of 9 balloons, which is $3 \times 9 = 27$ balloons.</p>	<p>recognise and represent division as grouping into equal sets and solve simple problems using these representations. (ACMNA032)</p>
30	3	<p>This triangle has 3 axes of symmetry.</p> <p>If Grace cuts in a straight line along any of the axes 1, 2 or 3, she will get 2 equal pieces.</p>	 <p>identify symmetry in the environment. (ACMMG066)</p>
31	13	<p>There are 6 bus stops before the 7th bus stop.</p> <p>As Sam said, “There is the same number of bus stops before and after this stop.”</p> <p>So there must be 6 more stops after the 7th bus stop.</p> <p>Hence, the total number of bus stops is $6 + 1 + 6 = 13$ bus stops.</p>	<p>solve simple addition and subtraction problems using a range of efficient mental and written strategies. (ACMNA030)</p>

32	6	<p>Each cow has 4 legs.</p> <p>As there are 6 lots of 4 in 24, so there are 6 cows on Julie's uncle's farm.</p>	<p>recognise and represent division as grouping into equal sets and solve simple problems using these representations. (ACMNA032)</p>																								
33		<p>Kylie swam a total of $100 + 200 + 300 + 400 = 1000$ m.</p> <p>Jessica also swam 1000 m, but she swam the same distance each day over the four days.</p> <p>Hence, she swam a quarter of 1000 m each day, which is 250m as shown in the graph.</p>	<p>recognise and represent division as grouping into equal sets and solve simple problems using these representations. (ACMNA032)</p>																								
34	Square pyramid	<p>A square pyramid has 5 faces.</p> <p>Four of the faces are triangles and the fifth is a square.</p> <p>None of the other solids (the rectangular prism, the sphere or the cone) have 5 faces.</p>	<p>describe the features of three-dimensional objects. (ACMMG043)</p>																								
35	5	<p>As shown in the table, the farmer needs to use 5 boxes of each size to pack 300 peaches.</p> <table border="1" data-bbox="528 1346 1112 1917"> <thead> <tr> <th>Number of 10 Peaches boxes</th> <th>Number of 20 Peaches boxes</th> <th>Number of 30 Peaches boxes</th> <th>Total number of Peaches packed</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>1</td> <td>1</td> <td>$10 + 20 + 30 = 60$</td> </tr> <tr> <td>2</td> <td>2</td> <td>2</td> <td>$2 \times 60 = 120$</td> </tr> <tr> <td>3</td> <td>3</td> <td>3</td> <td>$3 \times 60 = 180$</td> </tr> <tr> <td>4</td> <td>4</td> <td>4</td> <td>$4 \times 60 = 240$</td> </tr> <tr> <td>5</td> <td>5</td> <td>5</td> <td>$5 \times 60 = 300$</td> </tr> </tbody> </table>	Number of 10 Peaches boxes	Number of 20 Peaches boxes	Number of 30 Peaches boxes	Total number of Peaches packed	1	1	1	$10 + 20 + 30 = 60$	2	2	2	$2 \times 60 = 120$	3	3	3	$3 \times 60 = 180$	4	4	4	$4 \times 60 = 240$	5	5	5	$5 \times 60 = 300$	<p>represent and solve problems involving multiplication using efficient mental and written strategies. (ACMNA057)</p>
Number of 10 Peaches boxes	Number of 20 Peaches boxes	Number of 30 Peaches boxes	Total number of Peaches packed																								
1	1	1	$10 + 20 + 30 = 60$																								
2	2	2	$2 \times 60 = 120$																								
3	3	3	$3 \times 60 = 180$																								
4	4	4	$4 \times 60 = 240$																								
5	5	5	$5 \times 60 = 300$
